

PT BELGANA PERMATA ABADI

PORTFOLIO

Ar. Deflins Ante, IAI

est. 2001

ABOUT US

Founded in **April 2001**, we began our journey as a civil construction company, specialising in the development of private residential homes across Jakarta. From the beginning, our work was guided by our commitment to craftsmanship and precision to ensure that our work stand the test of time.

As our work gained recognition for its quality and reliability, Belgana earned the trust of a broader range of private clients, institutions, and corporate entities. By 2003, this trust led to an expansion beyond civil construction into office interior design, and later into steel constructions, allowing us to deliver more **integrated and comprehensive architectural solutions**.

Today, Belgana operates as a multidisciplinary practice delivering **end-to-end tailored architectural and construction services**. We work in close collaboration with experienced technical experts—architects, designers, engineers, and on-site project managers—ensuring every project is thoughtfully planned and executed with precision.

Our approach is rooted in sustainability and contextual design, responding to its surroundings and purpose. Our portfolio spans **residences, offices, warehouses, cold storage facilities, and industrial buildings**, encompassing **civil construction, steel structures, interior works, and custom furniture**.

Belgana

Architecture with Intention — Designed to Inspire, Built to Endure.

Location

Ruko Paramount Glaze 2, Block C No. 11,
JI Boulevard Raya,
Gading Serpong,
Kabupaten Tangerang,
Banten,
